Redefine the microscope

MS33W

Round metal base with flexible arm and holder for the Dino-Lite. An additional feature of the MS33W is the fine adjustment knob in the base of the stand. Using this knob, you can focus the Dino-Lite in situations where it may be too difficult to move the adjustment dial on the microscope itself.

MS-W1

Special stand for cylinder surfaces or to roll on flat surfaces. The MS-W1 stand enables the user to easily examine cylindrical objects such as printing rolls. With the two barrel rollers, the MS-W1 stand can also be rolled forward or backward making it a great solution for surface inspection; such as inspection of artwork, blank PC boards, or any other flat surfaces.

MS09B

An ultra-portable mini stand that holds the Dino-Lite in place whenever you need to. Easy to take on travel.

MS34B

The MS34B is a great stand to assist the high magnification Dino-Lite models. Compact and sturdy design.

MS12C

Portable cradle stand with two adaptors and three fixed working distances. Can be easily slid over the object without losing the focus.

MS35B

Robust and sturdy metal base providing precision adjustment and positioning. The MS35B has a range of up to 25 centimeter (10 inches) of vertical working distance (up to 50 centimeter / 20 inches with the optional extension pole).

MS36B

Like the MS35B stand, but with an additional horizontal beam for viewing larger objects. The vertical pole can be extended with the MS30X pole extension set.

MS52B

Heavy table top clamp-on jointed stand with a wide working range of 62- 92 cm (23-36 inches). It can be easily clamped onto workstation or table top. A table base (MS52BA2) is also available.

SL-ZW1

The SL-ZW1 is a polarized USB powered gooseneck light with the ability for the polarization to be adjusted by a simple rotation on the accessory itself.

SW-F1

The SW-F1 allows you to take a picture with a simple step from your foot using the Dino-Lite or Dino-Eye digital microscopy solutions. No additional software is required, simply plug in the device into your USB port and it is ready to use.

MS16C

Specimen holder stand with different clips to hold specimens. Four levels of orientation.

MSAK810

This adjustable flex arm is a great addition to a MS35B/MS36B allowing in-depth visual inspections with multiple Dino-Lite's.

BL-ZW1

Portable Back Light with built-in Polarizer. The backlight has a built in, freely rotatable polarizer that works in combination with the AM413ZT or AD413ZT polarizer models. Great design housing made from brushed aluminum alloy.

MS23B

This desktop clamp with a flexible gooseneck can be clamped to a desktop or any other surface of up to 3cm thickness.

MS15X

XY Base with Removable Rotating Table. The MS15X is an advanced XY table that can be used independently or in combination with the MS35B or MS36B column stands.
